The Royal Society for the Conservation of Nature

The Royal Society for the Conservation of Nature is an independent national organization devoted to the conservation of Jordan's natural heritage. RSCN was established in 1966 with His Majesty the late King Hussein as Honorary President. RSCN has the mission of protecting and managing the natural resources of Jordan. It is responsible for protecting wildlife and wild places. Thus, it is one of the few national organizations in the Middle East with such a public service mandate.

Wild Jordan

Wild Jordan is a registered trademark of The Royal Society for the Conservation of Nature.

Wild Jordan’s revenues contribute to the sustainability of RSCN’s protected areas and supports the socio-economic development of local communities.

NATURE INSPIRED ... ETHICALLY DEVELOPED.

Mujib’s Nature Inspired Crafts

Handcrafted Silver Jewelry

Women in the local Fagu'a community use designs inspired by Jordan’s nature to create one-of-a-kind brooches, necklaces, and earrings.

Medicinal Herbs

Herbs, harvested from the Mujib area, are dried and turned into herbal teas that are not only healthy but delicious, too!

Sand-blasted Stone

Local stones are blasted with Jordanian sand, creating unique designs that are reminiscent of the natural sites throughout all of Jordan’s reserves.

To buy Wild Jordan’s handmade products, visit our nature shops or call (+962 6) 4633 718.

The Baptismal Site

Visit the Dead Sea Village and its Dead Sea Panorama Complex. From here, you can take a short bus to the village itself.

Mujib Trails Safety Rules

- If you have a serious health problem, do not attempt abseiling or canyoning.
- You must know how to swim.
- All visitors must be at least 18 years old for Mujib trails.
- All visitors must wear a life-vest, which is available at reception.
- Life-vests are mandatory; no exceptions.
- Keep away from all dangerous areas which are marked by warning signs and/or closed by ropes.
- Only swim in the allowed areas.
- Keep close to your group.
- Use the installed ropes to climb the small waterfalls, and abide by warning signs along the trails.
- Do not bring any valuables on the trails. RSCN is not responsible for lost items.
- Save Nature - Avoid damaging trees and shrubs and do not add graffiti.
- Do not collect specimens; (leave all rocks, plants, and animals as you found them).

The visitor enters the Reserve on his/her own personal responsibility, and The Royal Society for the Conservation of Nature does NOT hold any liability or responsibility for any accident or injury inside the reserve or caused by the usage of a facility or the trails.

The way to Mujib Reserve

From Amman, the trip to Mujib Biosphere Reserve takes approximately 1.3 hours. Starting at 7th Circle, take the Desert Highway (Airport Road) south. Approximately 5km from 7th Circle, take the exit on the right to the Dead Sea. 45 km from the exit, the highway will merge with the Dead Sea-Aqaba Highway. Follow the Dead Sea-Aqaba Highway until you reach the Mujib Bridge.

As you approach the bridge, you will find Mujib Adventure Center on your left and Mujib Chalets on your right.

Explore Mujib

Activities | Accommodation | Dining | Directions
The center also has a cafeteria, shop and waiting area.

Is the starting point of all the adventures and activities (except al Mujib Trail). In Jordan, it is a special spot for the adventure lover in Jordan and the world.

Ebral (also known as Ebral King's Road) to explore Wadi al Mujib, and it is a special spot for the adventure lover in Jordan and the world.

It serves as an internationally-recognized staging ground for migratory birds, with more than 90 species being observed. During April and May, you may even be able to witness more than 10,000 birds per day. The event is known as the Spring Migration. The Festival is held every year during the spring season.

The Chalets area serve indoor restaurant that offers a range of dishes from the local cuisine. The Chalets have sea view, shaded sun terrace, hammock, air conditioning, private bath and beautiful views. The Chalets are equipped with all the necessary amenities to ensure a comfortable stay.

The waters of the Dead Sea, which are among the saltiest in the world, offer an excellent place for floating and swimming. The beach areas are equipped with umbrellas, chairs, and other amenities.

You will pass through white rock hills to the Mujib River. The hike then continues along a number of trails that offer a breathtaking view of the Dead Sea, towering sandstone cliffs, and the surrounding landscape.

Mujib Biosphere Reserve

The Mujib Biosphere Reserve is an area that offers a unique and diverse range of activities, from hiking and rock climbing to sightseeing and cultural tours.

Wadi Hidan

Black Hole 1 is a popular and moderately challenging route that offers a great view of the Dead Sea and surrounding landscape. You can start your canyoning trip from the upper side of the Mujib Biosphere Reserve. The valley's diversity of rock formation, springs, waterfalls, water pools, and biodiversity.

Malaqi Trail

The trail starts from the visitor center and moves from the Southwest to the Northeast. You will swim from pool to another until you make it to the end of the trail after about one hour. There is transportation at that point awaiting the visitors.

Canyon Trail

The trail is open almost all year from the Visitor Center but can be closed due to extreme weather conditions. It is a guided trail, and you will need to book in advance. The trail is covered with slippery rocks, and it is essential to wear proper hiking shoes. The trail is also equipped with safety harness and equipment.

Ibex Trail

We have installed a zipline of two parallel cables that run between the Visitor Center and the trailhead. You can choose to zipline to the end of the trail or return back to the Visitor Center. The zipline is a thrilling experience and offers a unique view of the surrounding landscape.

Al Hidan Trail

Guided only

Distance: 5 km

Starting Time: 8:00 a.m. to 3:00 p.m.

Top rope climbing is a style of climbing in which a rope is used to support the climber throughout the ascent. The rope is attached to the climber's harness and can be used to arrest a fall. The climber can either climb free solo (without any protection other than the rope) or lead climb (with a belayer). A belayer is a person who supports the climber by means of a belay system. The belayer can be a rope or a harness. The belayer can also be a computer program that simulates the belayer's behavior.
